

faema E61 legend / jubilé

200 years of excellence in coffee

With over 200 years of excellence in coffee you can trust miko to offer you the perfect blend, combined with the finest espresso, filter and bulk brew equipment

faema E61 legend / jubilé

In 1961 Faema produced the world's first pump operated espresso machine. Though much copied, it has never been surpassed and to date remains one of most stylish and beautiful coffee machines ever built.

To celebrate and continue the success of the iconic E61, Faema produced a faithful recreation of this masterpiece, equipping it with modern technology. They created both the E61 Legend, an authentic copy, and the automatic E61 Jubilé. Through these creations, Faema has made it possible for future generations to enjoy this jewel in the Faema crown.
