

faema E98 compact

200 years of excellence in coffee

f a e m a E 9 8 c o m p a c t

With the new series E98 Compact, Faema transfers the reliability of the components, the ease of use and the advanced technologies, typical of all its products, in machines characterised by compact dimensions, suitable for those caterers who have limited space but demand professional performance.

Faema E98 Compact - A compact automatic espresso coffee machine featuring programmable coffee, frothed milk and cappuccino selections and a built-in volumetric pump.

f e a t u r e s

- 1 multi-directional stainless steel steam arm
- 1 multi-directional stainless steel hot water tap
- Cappuccinomatic®: it allows preparing the cappuccino automatically, by pouring the frothed milk and the espresso directly into the same cup according to the programmed doses
- LED signalling: machine ON - boiler level and temperature - (tank level for the 1 group version)
- Electronic boiler fill
- Automatic valve which prevents the liquid to be heated from being sucked back into the boiler and hot water economiser
- Built-in water tank + water softener (one-group model only)
- Pressure gauge to control the boiler pressure

	dimensions WxDxH	boiler capacity	max power 220/380v
